

THE KAITO 'SUPER RADIO' (KA1121)

DIGITAL SHORTWAVE, AM/FM, NOAA WEATHERBAND AND DOCKING MP3 PLAYER/DIGITAL VOICE RECORDER

In the history of the Radio Industry, there has never been a radio like this. A digital Shortwave AM/FM Radio with all the traditional features like Single Sideband, combined with a built-in docking MP3 player. And one of the most versatile MP3 players you can imagine. It combines a 256MB memory good for 10 hours of high quality recording directly from your radio. You can also 'timeshift' and program the unit to record a radio show at any specific time. The MP3 player comes with a sophisticated music management software program, so you can download your music collection. The MP3 player also works independently as a digital voice recorder, recording up to 15 hours of voice files. Additionally, the radio has a built-in 'Audio Out Dock', so you can plug your iPod or other portable device (CD or Cassette player) into the unit and use it as an amplified speaker. It even includes the cable to make this connection.

The Kaito Super Radio also has built-in Digital NOAA Weatherband and will access all seven National Weather Service stations anywhere in the U.S. The unit operates on included 'AA' rechargeable batteries that can recharge in the unit. This will charge the radio & MP3 and includes the AC Adapter. Also, the AA rechargeable batteries are removable, so you can use them in a pinch to operate a digital camera or other device.
