

Kill A Watt™ PS

Electricity Usage Monitoring Power Strip

**"Empowers"
you to save \$100's
on electric bills!**

Now you can protect your valuable electronics and find out what they are actually costing you. Simply connect these appliances into the Kill A Watt™ PS, and it will assess how efficient they are while the built-in surge protection keeps them safe.

Calculate your cumulative electrical expenses and forecast by the day, week, month, even an entire year. Also check the quality of your power by monitoring Voltage, Line Frequency, Amperage, KWH/Leakage and more. Now you'll know how much your entire computer or home theater system is costing you. With the innovative Kill A Watt™ PS you'll have peace of mind in more ways than one.

- Shows the operating costs of your electronics
- Integrated surge protection
- Spike-free ON/OFF switch
- Large backlit LCD Display
- Calculates cost and forecasts by week, month and year
- Displays eight critical units of measure

Specifications:

Model:	P4320
RMS Voltage:	108.0 - 132.0 Vrms
RMS Current:	0.0 - 15.0 Arms
Active Power:	0 - 1980 Watts
Power Factor:	0 - 100%
KWH:	0.00 - 9999 KWH
Leakage Current:	0 - 30mA
Weight:	1 lbs. 11 oz.
Dimensions (WxHxD):	12 3/4" x 3" x 2 1/2"
