

PC TRICKLESAVER™

Reduce standby power of PC accessories

OVERVIEW

The product reduces the standby energy consumed by PC accessories. The product connects to a PC via a standard USB connector and detects the power status of a PC via the USB port.

When a PC is powered the product will switch On all accessories. Conversely when a PC is powered Off, the product will switch Off all accessories. The product is easy to install and provides simple automation to reduce wasteful standby energy consumption. The product is suitable for residential and workplace PC applications.

The product can be connected directly to equipment or connected to a standard electrical powerstrip with a number of connected devices.

KEY FEATURES

- In-built relay for switching off devices that consume standby current.
- Rear mounting holes for wall, under desk mounting.

PRODUCT WARRANTY

The product is supplied with a 1 year product warranty against defective manufacturing and components.
